What is ISO 27001?

The ISO 27001 standard was published in October 2005, essentially replacing the old BS7799-2 standard. It is the specification for an **Information Security Management System (ISMS)**. The standard provides a model for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving the ISMS.

ISO 27001 addresses the following areas:

1. Risk assessment and treatment
2. Security policy
3. Organization of information security
4. Asset management
5. Human resources security
6. Physical and environmental security
7. Communications and operations management
8. Access controls
9. Information systems acquisition, development and maintenance
10. Information security incident management
11. Business continuity management
12. Compliance.

ISMS may be certified compliant with ISO 27001 by a number of Accredited Registrars worldwide.

Why ISO 27001?

ISO 27001 is a worldwide accepted standard for information security and demonstrates maturity of your IT processes and organization and establish customer (internal or external) confidence in your information security capabilities. Implementation of a standard such as ISO 27001 also results in greater security awareness within your company. This may also let you benchmark within your peer community.

Increasingly, internal IT teams are also turning to ISO 27001 to demonstrate their abilities to their senior management, board of directors and audit committee.

It also helps you meet legislative and regulatory compliance requirements and keep your auditors happy!

How MANTRAN can help?

MANTRAN provides assistance in developing and implementing ISO 27001 aligned ISMS. We also assist organization in selection of ISO 27001 certification agencies that perform the certification audits.

MANTRAN's approach to achieve ISO 27001 readiness is based on the 'Plan-Do-Check-Act' model. This approach begins with consideration of information security requirements and expectations of the

organization based on the internal and external business environments and available best practices. These form an input to developing the ISMS which is constantly monitored and reviewed to incorporate improvements to meet the challenges of newer threats in a changing operating environment.

MANTRAN ISMSReady Suite

MANTRAN follows a structured phase-wise approach to prepare you for ISO 27001 certification. This typically involves the following:

1. Define scope of ISMS
2. Gap analysis
3. Risk assessment
4. Select control objectives
5. Develop ISMS
6. Implement ISMS
7. Post implementation review.

Knowledge transfer

We assist you by empowering your employees to sustain the compliance effort on an ongoing basis. We work with your team to transfer knowledge as part of our work. We also offer trainings and workshops for ISO 27001 compliance.
