

IT Audit Academy

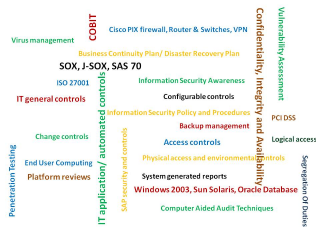

Is your IT audit team adequately trained? Does your IT audit team get an opportunity to refresh their IT audit concepts regularly? Do you want your operational/ financial audit team to also conduct IT audits? Is your audit team aware of relevant information security standards, guidelines and regulatory requirements? Does your audit report fail to create the impact that it should?

MANTRAN's **IT Audit Academy** assists you in upgrading and refreshing skills and competency of your IT audit team. It is useful for both professional services organizations and organizations with internal audit teams.

Business Need

Information is an asset that is essential to any organization's business and therefore, needs to be protected, particularly in today's interconnected business environment. Preserving confidentiality, integrity and availability of information is essential to maintain competitive edge, profitability and commercial image of an organization.

IT audit helps management determine if information systems are safeguarding assets, maintaining data integrity, and operating effectively to achieve organization's goals or objectives. IT audit may be performed in conjunction with a financial statement audit, internal audit, or other forms.

IT Audit Academy guides you through the information security fundamentals and its application in today's business environment. It starts with basics and covers various topics to provide holistic understanding of IT audit. The understanding is reinforced through use of various real-life scenarios and case studies.

The expectations placed on auditors are at their highest, making the profession more exciting but also more challenging. As usage of IT in organizations gains in

importance, **IT Audit Academy** is a good and effective way of equipping auditors to understand the risks posed by IT and controls needed to mitigate business risks.

How MANTRAN can help?

MANTRAN's **IT Audit Academy** focuses on all areas, which are important for IT audits. It starts with IT audit fundamentals such as types of IT controls and IT controls testing techniques. **IT Audit Academy** provides a holistic view by explaining various facets of IT audit such as IT general controls, application controls, platform review, etc. It covers information security policies and procedures, information security awareness, disaster recovery plan, etc to provide complete view of information security.

IT Audit Academy provides business process understanding, which is required to conduct IT application controls. It provides overview of various information security compliance standards, guidelines and regulatory requirements such as COBIT, ISO 27001, SOX, SAS70, PCI DSS, etc and security controls in commonly used technology platforms such as operating system, database and networking infrastructure.

Who should attend?

IT Audit Academy is useful for both IT and operational/ financial auditors.

For new IT auditors, it provides comprehensive understanding of IT audit. For experienced IT auditors, it provides an opportunity to refresh and update their existing knowledge and learn new concepts.

Operational/ financial auditors gain an understanding of the IT governance, risk and compliance processes through this academy. This provides them the 'complete' picture of audit and helps them plan and conduct an efficient and effective audit.

Why MANTRAN?

MANTRAN brings extensive experience in IT security professional services.

The IT Audit Academy is conducted by experienced IT security professional with more than 10 years of experience in IT audit. Our trainers have worked with Big 4 audit firms and bring knowledge and experience of conducting numerous large and complex IT audits under diverse IT environments.

The academy can be customized to suit your requirements.
